

Online programme

Our Passivhaus Designer course runs online over a five-week period, focusing on half-day webinars delivered by Passivhaus experts. We offer additional intro sessions, support sessions, self-study, and homework. We also offer pre course material and prepare you for the exam with support sessions, exercises, and mock exam. Our training team has worked hard to ensure that the online schedule maintains the quality and key elements that we pride ourselves on peer interaction, in-depth knowledge sharing and one-to-one support.

Set up:

The live series will be hosted using Zoom. You will need PC/laptop when attending our live sessions from 1-5pm. (Tablets or smartphones are not suitable). Headphones or microphone and video capability. During live session, please behave as if everyone is in one classroom together: we ask you to keep your camera on at all times, participate by asking questions and sharing your experience, allow other participants to express their opinions respectfully and make sure to complete any pre course reading or homework before the session. In addition to Zoom, we use Teams to post information during the course, homework revisions and encourage chats with your fellow delegates.

MODULES:

All live sessions run from 1-5pm from Tuesday-Friday (except case studies, Revision and exam sessions).

28th Oct and 4th Nov Welcome session and Intro to Science (short sessions)

Introduce you with the trainers and your fellow delegates and run through simple algebra exercises.

W/c 31st Oct Fundamentals of Passivhaus (approx. 10hrs self-learning)

Complete this self-learning fundamentals module as part of your pre course material.

W/c 7th Nov Science of Passivhaus

Delivered over 4 half-day sessions through webinar, interactive exercises, self-study videos and homework.

W/c 14th Nov Construction for Passivhaus, Case study and Crit session
